EXPERIENCE

AetherWorks LLC
New York, NY

Product Quality Manager
Feb 2016 – Present

- Coordinated all Quality Assurance testing for our new flagship software, AetherStore 2.0
- Developed AetherStore Chaos-Monkey, an internally-used, versatile automation and testing platform written using Python 3 and MS PowerShell, in addition to programming numerous stand-alone stress and performance tests
- Improved various aspects of the AetherWorks Partner Portal UI, written in Java and Spring
- Conceived a new and more efficient model for AetherStore's sliding-window space-allocation algorithm, currently in development for future releases of AetherStore
- Managed all Systems Administration duties including Server + VM backups and maintenance, Active Directory Management, and internal wiki operation
- Oversaw the handling of all technical customer-service tickets and inquiries

General Assembly
New York, NY

Web-Development Immersive Developer
Aug – Nov 2015

Nostalgia Gaming Pack
Web-based game collection of timeless arcade classics, playable on a single platform

- Constructed multiple games from scratch using Phaser.js, a powerful JavaScript framework designed for game creation
- Games include Snake, Helicopter, and Breakout, each with unique mechanics and logic

Pluto Academy
Website for an imaginary university featuring varying User roles with different actions and privileges to create an interactive portal experience

- Collaborative full-stack project built with Ruby on Rails, database managed with PostgreSQL
- Employs Facebook OAuth API to enable portal login through personal Facebook accounts

Hip-Hop Wiki
Full-stack web application in which users can write, edit, and share hip-hop articles

- Produced a wiki page with working login system and article & category creation features using Ruby on Rails
- Cross-functional back-end database created and managed using PostgreSQL
